**GitHub :** <https://github.com/Vamshi2629> **Linkedin :** <https://www.linkedin.com/in/vamshiboda27>

## Summary :

- Extensive experience in developing web pages using HTML5, CSS3, JavaScript, React JS, Bootstrap, and ES6.
- Good knowledge in developing single-page applications (SPAs).
- Skilled in customizing CSS frameworks like Bootstrap and Material Design
- Proficient in React JS framework for developing SPAs, with experience in React JS components, Forms, Events, Router, React Hooks.
- Knowledgeable in creating custom reusable React components libraries.
- Skilled in front-end development with back-end system integration.
- Proficient in version control tools such as GIT for source code management.
- Ability to work effectively both as a team member and individually.
- Well-organized, goal-oriented, with excellent communication and interpersonal skills.

## Technical Skills:

**Operating Systems** : Windows Family

**Frontend Technologies** : HTML, CSS, JavaScript, HTML5, ES6, React JS,

**Frontend Libraries** : Bootstrap, Material UI, Reactstrap

**Design Approach** : Atomic Design

**Languages** : Python basics, Java basics

**Databases** : MySQL

**Tools & Others** : VS Code, GIT

**Education Qualification** : - B. Tech (CSE) from JNTUH affiliated Engineering College.

**Professional Experience** : -

**Elbert Technology private limited, Hyderabad, India**

**Projects:** CRM, Fairneft, Learnity

## Frontend Developer

As a Frontend Developer at Elbert Technology, I focus on building responsive and interactive user interfaces using React JS for various web applications. I collaborate with backend teams to ensure seamless API integration and real-time data flow. My contributions include maintaining high coding standards, optimizing performance, and delivering user-centric features that improve overall application functionality and user experience.

## Projects :

## **CRM (CustomerRelationship Management)**

### *Frontend Developer* **Responsibilities:**

- Developed the user interface using React JS for a CRM application to improve user experience and streamline business operations.
- Utilized React JS components, including forms, events, keys, and router concepts to ensure seamless user interaction.
- Maintained coding standards and best practices to create reusable and easy-to-understand code for improved maintainability.
- Collaborated closely with the backend team to integrate APIs and ensure seamless data flow between the frontend and backend.
- Regularly used Git for version control and pushed code to GitHub for collaborative development.

**Environment:** ReactJS, JavaScript, Bootstrap, Reactstrap, CSS, HTML5, VS Code, Git

## **Learnity**

### *Frontend Developer*

#### **Responsibilities :**

- Contributing to the development of user interfaces for a learning platform using React JS, focused on creating an engaging and intuitive experience for users..
- Staying updated with the latest React technologies, tools, and development trends to provide technical guidance to the team.
- Leveraging React JS components, including forms, events, and routing to enhance application functionality and user flow.
- Working in close collaboration with the backend team during phase two to integrate custom components and library components for data display.
- Maintaining best practices in code quality and performance optimization, ensuring a seamless integration of APIs to facilitate real-time data flow.
- Managing version control using Git and pushing code to GitHub to maintain codebase consistency and facilitate team collaboration.

**Environment:** ReactJS, JavaScript, Bootstrap, Reactstrap, CSS, HTML5, VS Code, Git

## **Fairneft (Current Project)**

### *Frontend Developer*

#### **Responsibilities:**

- Developed the fintech loan app's UI using ReactJs, enhancing user experience.
- Collaborated with the backend team to integrate APIs for seamless data flow.
- Built reusable React components for maintainable, scalable code.
- Used Bootstrap and Material UI for a responsive, consistent design.
- Managed code with Git for efficient collaboration and version control.

**Environment:** ReactJs, JavaScript, Bootstrap, Material UI, CSS, HTML5, VS Code, Git
